Gladiolus

CURTICE C. WHITE
HATFIELD, PA.

Spring Bulletin, 1932

NEVER before have you been able to buy the very best in Gladiolus at prices as low as the old ordinary kinds are generally priced. When we say the best, we mean just that. There are no new varieties to take the place of Mr. Phipps, Mrs. Douglass, Dr. Bennett, Minuet, etc. Such varieties as Betty Nuthall, and Marmora are also coming down within the reach of everybody.

Many who saw the spikes of these wonderful varieties in our exhibit at Atlantic City, last year, were actually dumbfounded when they learned how reasonable their cost was. One gentleman stood looking at our basket of Phipps. After some time he heaved a sigh and said, "Well, tell me the bad news. How much is that variety?" Another gentleman, on being shown a basket of Douglas and asked if he grew that variety, remarked that it was impossible for him to afford such things since he was just a working man. Both were astonished when the prices were quoted.

So, we say, this is a time when the highest quality can be secured for the lowest cost. However, many new and improved varieties in other colors and types are constantly being introduced. We are growing many of these on trial and gradually adding the best of them to our list.

We are delighted with the many compliments we are receiving from our customers, as to the results obtained from our bulbs. We make it a policy never to send out anything that we would not want to buy ourselves. Of course, we cannot guarantee the results you will obtain, but we do guarantee our bulbs to be clean, strong, and true to name, and that, with reasonable care, your results will be satisfactory.

We prepay all carriage charges on orders amounting to at least \$1.00. We shall be glad to quote you prices on any quantity and size of any variety you desire. Please send cash with order.

Orders accepted subject stock unsold. Please order early.
